

Cladding Options save money

MINIMISE TRADES

Select a cladding option that minimises the amount of trades required to install and finish it. Your builder should have a list of materials they can use. This is why bricks were so popular for so long.

CLADDING COVERAGE

Selecting a cladding option that comes in a sheet as opposed to individual (WB) are faster to install hence cheaper to install

MIX & MATCH

Dont be scared to mix & Match materials. If the back and side of the dwelling is against a fence or only seen by neighbours - spend the money on the "SEEN" areas.
